

A teal triangle points downwards from the top left, overlapping a yellow rectangle. A vertical column of yellow dots runs down the left side of the page.

Bespoke Research Program

A yellow horizontal bar spans the bottom of the page, with a teal shape curving upwards from the right side. A vertical column of yellow dots runs down the left side of the page.

Program Structure

SCHOLAR

Dear Student,

Welcome to EZ Scholar,

We appreciate your commitment to research and are excited to be working with you. Over the next 10–12 weeks, our team will work closely with you to accomplish your goals.

Provided below is a generic program structure which will help you understand this journey better. Please keep in mind that based on your specific project, the program structure may change a little from what we have indicated in the document.

Results in any academic pursuit are directly proportional to the effort and hard work put in by the student. As such, the most crucial ingredient for success is your time commitment and diligence. We require your commitment on the following points:

1. Students will work with a mentor on a one-on-one basis.
2. Mentors will be assigned based on the subject and topic the student wants to research.
3. We will organize a meeting for the student and the mentor prior to the engagement starting. If both, the student as well as the mentor agree the project will proceed.
4. Mentors will schedule meetings on Google meet. We encourage keeping the same slot for each week. This allows the students as well as the mentors to plan their schedule better.
5. Please keep track of the meetings via your calendars. We expect students to show up punctually for the meetings.
6. Please complete any tasks assigned to you prior to the next meeting.
7. You should aim to work for at least 5 hours on your own prior to each meeting.
8. The preparation for each meeting will allow you to discuss your doubts and concerns with mentors.
9. Please utilize the various sources for additional information, research articles that are provided to you. It will help in writing a high-quality paper.
10. In case your research requires any data gathering, surveys and/or simulation, please discuss the plan promptly with your mentor.
11. We encourage all students to submit their papers for publication. It will be helpful to keep in mind the publication where you eventually plan to submit your paper. You can review some of the papers provided in this document for reference.

Remember that your objective is to learn how to conduct college level research and to come up with a good work product that showcases your knowledge and hard work in a timely manner.

If you have any additional questions or concerns, please reach out to the following.

Suchita Dakhane +91 93726 69388	Raksha Ramawat +91-9625402542
------------------------------------	----------------------------------

Warm regards,

Abhishek Sinha

Head of Relationship Management

Indicative Program Structure

Initial Meeting (30 minutes) – Introduction and general discussion with the mentor.

The research paper will start when the mentor and student agree upon the general topic. We will then discuss suitable dates/time for the meetings and the mentor will send out meeting invites for subsequent sessions.

- Session 1:** Introduction to research methodologies and mentors' research.
- Session 2:** Selection of the research topic that is relevant and interesting.
- Session 3:** Finalization of the research topic and scope.
- Session 4 – 7:** Data collection, simulations, literature review and initial submission.
- Session 8:** Review and feedback by mentor on the initial submission.
- Session 9 – 10:** Additional discussion and report enhancement.
- Session 11:** Final report submission to research mentor.

Published Papers

S.No.	Student Name	Subject	Topic
1.	Avni Yadav	Physics	Energy Conservation for Projectile Motion Problems
2.	Sanil Arora	Physics	Gravity Simulation
3.	Sanil Arora	Physics	EPR Spectroscopy.
4.	Abhinav Gupta	Physics	EPR Spectroscopy.
5.	Prakrit Singh	Physics	EPR Investigations
6.	Srihaun Pujari	Physics	Electron Spin Resonance
7.	Samika Chander	Physics	Mask Dryer
8.	Keshav Sheshadri	Physics	Aerodynamic review of the 2010 McLaren Mercedes rear wing
9.	Ritvika Tripathi	Physics	Comparative Study of Active and Passive Thermal Control Systems
10.	Hithesh Nabiraj	Aeronautics Engg.	ANALYSIS OF LIFT AND DRAG W.R.T TO NACA 5-DIGIT SERIES AIRFOILS
11.	Reeya Ajay	Economics	Understanding Japan's Deflation: Causes, Challenges and Policy Lessons
12.	Vidit Goel	Economics	Fast Fashion
13.	Riddhi Jain	Economics	Sell in May Effect
14.	Arin Modi	Economics	Stock Market Anomaly.
15.	Romeer Rao	Economics	January Effect
16.	Romeer Rao	Economics	FDI and Inequality: A Comparative Study of India and Japan
17.	Lakshya Batta	Economics	January Effect
18.	Yashita Pujari	Economics	China's Debt Trap
19.	Vaibhav Saha	Economics	Investigating the Relationship between Monetary Policy and Stock Prices
20.	Radhika Dadhich	Economics	Impact of U.S. Monetary Policy on Asset Prices
21.	Jia Sankhla	Economics	Investigating Financial Bubbles and Bursts
